EDUCATION

PhD in Industrial & Systems Engineering

Auburn University

Auburn, AL

Expected Graduation 2029 – **4.0 GPA**

Masters in Social Business

University Peloponnese & National Center for Social Research

Athens, Greece

Graduated 2023

Integrated Masters in Electrical & Computer Engineering

Aristotle University of Thessaloniki

Thessaloniki, Greece

Graduated 2021

TECHNICAL SKILLS & TECHNOLOGIES

Programming: Python, R, Julia, SQL, Docker, Git

Data Science/Engineering: Pandas, FastAPI, Geopandas, ArcGIS Pro

ML/DL/Optimization: Keras/Tensorflow, Pytorch, Scikit-learn, statsmodels, Gurobi, networkx

Simulation Technologies: Stella, Simio, SimPy, Gym/Gymnasium

Cloud Technologies: GCP (Google Cloud Run, BigQuery, Compute Engine, Cloud Storage)

Languages: English [Native], Greek [Native], Turkish [Intermediate]

Citizenships: Greek and US Citizen

WORK EXPERIENCE

Auburn University, AL

Research Assistant – Inventory Control

Auburn, AL

October 2024 – Present

- Developed an inventory control optimization model using simulation and mixed integer linear programming for the US Air Force as part of a research assistantship.
- Participated in a teaching assistantship for over 200 undergrads in Deterministic Operations Research, Statistical Quality Control, Modern Tools for Data Analytics.

ATHENA Research Center

Research Associate

Athens, Greece

2022 - 2024

- Worked on a Horizon Europe project (**4.1 million €**) focused on biodiversity, [BIONEXT](#).
- Participated and published a systematic literature review of 2633 articles on resource interlinkages by collaborating with 9 other partner institutions in 7 other countries.
- Developed 6 national dynamic simulation models for resource management and their impact on the 17 Sustainable Development Goals in Europe.

University of Thessaly, Greece

Research Associate – Data Science, Department of Environmental Sciences

Volos, Greece

2021 – 2024

- Worked on 4 interdisciplinary European Horizon 2020 projects with **100+** European partners on data science and machine learning applications on climate hazards and urban sustainability.
- Led part of a **1,000,000€** case study in Athens, Greece, which resulted in 3 journal publications on network analysis, knowledge graphs and graph databases, and quantifying vulnerability through model inference and geospatial data analysis for [ARSINOE](#).
- Managed front-end development for a case study database for over 2000 case studies and personally set up a GCP database and API to serve the platform.

SingularLogic

Early-Stage Researcher

Athens, Greece

2021-2022

- Secured a 1-year Marie-Curie fellowship on the ENDORSE European HORIZON project, which culminated in the development of a video encoding algorithm in Python and IEEE conference publication.
